What remains unchanged

The original 80-page report, dated November 2, 2026, remains intact. This notice changes authorship credit only. It changes no research question, method, observation, analysis, figure, conclusion or public CSV file. It is not a new study or a new answer measurement.

The corrected preprint copy places this notice before the unchanged original report. The original cover and original PDF metadata remain historical parts of the original release and should be read with this notice.
